Title 124 Onsite Wastewater Treatment System
Onsite Wastewater Treatment Program

NDEQ Facility ID **14OWT008** Permit Application Number **14OWT008**

Owner Name **Word of Life Lutheran Church**

Project Description : One 1750-gallon 2-compartment concrete septic tank followed by a 4-inch pipe to a 4-inch perpendicularly oriented perforated pipe bedded in 3 linear feet x 18-inches deep of of 1-1/2-3-inch stone housed in a minimum 35-foot long x 10-foot wide submerged bed constructed wetland system lined with a single piece 45-mil EPDM liner supported by a woven geo-fabric. Flow then moves through approximately 29-feet of 1/2-1-inch washed gravel housing wetland plants then 3 feet of 1-1/2-3-inch stone and into a 4-inch perpendicularly oriented perforated pipe then into a level control structure. Flow is then piped into an un-lined wetland cell with a minimum 35-foot x 10-foot stone and gravel filed area x 18-inches deep overlaid with 3-inches of mulch.

Date Construction Permit Issued: **May 16, 2014**

Date Construction Started _____

Date Construction Ended _____

Name of Installer, Professional Engineer, or Registered Environmental Health Specialist under

whose direct supervision the system was constructed _____

NOTICE: If a Nebraska Professional Engineer (P.E.) was required for the onsite wastewater treatment system design, specification and permit application then this form must be signed by the P.E. who designed the system. (A P.E. is required on a system with design flow over 1,000 gallons per day, a system that handles other than domestic wastewater, or a system that does not meet required setbacks or reserve area requirements.) For a system where the only permit issues are *other design considerations* and the approved design was submitted by a Master Installer, then this form must be signed by the Master Installer. This construction completion notice is required in addition to the system registration in order for an operating permit to be issued by the NDEQ. See Nebraska Administrative Code Title 124, Chapter 3, Sections 003.03B and 005.01. If there is any question about who can sign the completion notice for this project contact the NDEQ Onsite Program.

I swear or affirm that the information and documentation submitted are true, complete, and accurate and certify that construction agreed with approved construction permit documents or subsequent changes approved by the Department.

522 Gallon Per Day On-site Wastewater Treatment Two Cell Submerged Bed Constructed Wetland System

Description:

One 1750-gallon 2-compartment concrete septic tank followed by a 4-inch pipe to a 4-inch perpendicularily oriented perforated pipe bedded in 3 linear feet by 18-inch deep 1-1/2 to 3-inch stone housed in a minimum 35-foot long by 10-foot wide submerged bed constructed wetland lined with a single piece of 45-mil EPDM liner supported on a woven geo-fabric. Flow then moves through approxomately 29-feet of ½ to 1-inch washed gravel containing wetland plants then 3 feet of 1-1/2 to 3-inch stone and into a 4-inch perpendicularily oriented perforated pipe then out to a separate level control structure. Flow is then piped into an un-lined cell containing 18-inches by at least a 35-foot x 10-foot stone and gravel filed volume overlaid with 3-inches of mulch.

NDEQ ID: **103849**
Program ID: **14OWT008**

Construction Permit No. **14OWT008**

Dear Mr. Oetting:

Construction shall be as described in the approved documents. It is your responsibility to make sure the facility is built as approved and all regulatory requirements met. We strongly recommend that you meet with your engineer and installer prior to construction to review the approved plans and specifications. If any modifications are necessary, Title 124 requires that you obtain written approval from the Department before changes are made to the system design.

An operating permit is required for use of this onsite system. After the system has been constructed, your Installer must properly register the system (submit completed form and fees) and your engineer must submit the construction completion card to the Department. A permit checklist, system registration form for a Title 124 permit system, and Engineer's notification of construction completion form have been enclosed to assist you with this process. Additionally, copies have been sent to your engineer. Once the system registration has been submitted by your Installer and the notification of construction completion submitted by your Engineer, the Department will evaluate for compliance and issue an operating permit if all regulatory requirements have been met.

Documents describing the above-referenced project have been approved and stamped accordingly. Pursuant to Neb. Rev. Stat. Sec. §81-1506(2)(Reissue 1987) and the requirements found in Nebraska Administrative Code Title 124, a permit for construction (enclosed) is hereby granted. This construction permit expires one year from the date of issuance. You may request renewal (subject to any changes in regulations and Department approval) prior to expiration.

Three sets of documents were submitted as part of the Title 124 permit application. One set of documents has been retained for the public record. The remaining documents are being returned to the submitting engineer for distribution.

Compliance with minimum sanitary engineering design criteria was the only consideration in the review of this project. Items such as quality of material, electrical and mechanical design features and structural soundness, were not considered unless specifically noted in the review comments. This approval does not release you, the owner, from your responsibility to provide an operable facility.

2014000422

Local zoning, siting or building code requirements are separate from and in addition to the requirements found in the Nebraska Administrative Code administered by the Department. Please continue to work with local officials to ensure any local requirements are met.

If you have any questions please contact Douglas Barry in the NDEQ Onsite Unit at Douglas.Barry@nebraska.gov or (402) 471-4203.

Sincerely,

Marty Link
Acting Water Quality Division Administrator
