Potential Waterway Flood Damage Evaluation

Waterway bottom elevations are -15' ½" at south property line; -15' 1½" at north property line. The lowest point (drain-out point) at the top of the waste lagoon dike is -9' 11¼". Therefore, the water in the waterway would have to be 5' 1¼" deep and an estimated 200' wide before it could flood our waste lagoon.
